linkedin.com/in/arshd-rashid-wani-658a47394

Software engineer focused on LLM evaluation and AI benchmarking, with a grounding in backend development and database systems. At Handshake AI, I write hard, realistic terminal tasks that frontier coding agents are graded on. I also build and ship my own tools, and publish each one with its results.

EXPERIENCE

Jul 2026 – now

Handshake AI · AI Fellow

- Coding-agent task design (now): design and evaluate hard coding-agent tasks and automated verification workflows.
- Terminal benchmark authoring (Sep–Oct): author tasks that must pass a reference solve, test validity, rubric review and a frontier-model difficulty check.
- Agent benchmark engineering (Jul–Sep): built tasks end to end and tuned difficulty with pass@k; read agent logs for reward hacking and closed the loopholes.
- Multilingual evaluation (Oct): evaluated Hindi/English assistant models against live app state and reviewed other fellows' work.

Feb – May 2026

Independent · AI trainer and evaluator, part-time

- Trained and evaluated AI model responses.

SELECTED PROJECTS

Coding-agent benchmark tasks · Benchmark tasks
One of my tasks went unsolved in 5 of 5 frontier-model attempts. Every task has to pass a CI difficulty check against a frontier model.
Private benchmark

Is It Actually Hard? · Simulator
A clean 0 for 5 still allows a 45% solve rate. Showing a task is under 10% takes 29 straight failures. Exact binomial maths, unit-tested.
arshdwani.github.io/is-it-hard

Asked Before · Browser tool
On real application forms, 13 of 62 auto-fills were wrong. Turning those errors into rules cut it to 4 of 58 on forms it hadn't seen.
arshdwani.github.io/asked-before

Offer or Bait? · Browser tool
Tested on real messages. v1 missed 25 of 48 scam emails sent to students and flagged 16 of 128 real job postings. v2: 3 missed, 0 false alarms.
arshdwani.github.io/offer-or-bait

Dynamo · macOS app · open source
A SwiftUI app plus a small root daemon that drives the Mac's SMC charging controls. The charging rules are one pure function, tested without a real battery.
github.com/arshdwani/Dynamo

The 200 Era · Data story
The median first innings hit 201 in 2026; no season before 2023 topped 174. Against four leagues without the rule, the IPL sped up 2.5 times as much.
arshdwani.github.io/ipl-200-era

Also shipped: LeakLens · Counterexample Studio · PIDGIN · Comet Court · Frankenfriends · Due Point · Ask the Kitchen · Curbmates · Calling card · ELI5 Anywhere. All linked at arshdwani.github.io/portfolio.

SKILLS

Languages	Python, Java, C++, Go, TypeScript, JavaScript, SQL, Swift, Rust, Bash
Backend & infra	REST, gRPC, PostgreSQL, Oracle, MySQL, Docker, Kubernetes, Linux, GCP, GitHub Actions
AI evaluation	Benchmark design, pass@k tuning, LLM evaluation, Rubric scoring, RAG, PyTorch, pandas

EDUCATION

Master's, Computer Science
National University College · 2024 – now

B.Tech, Computer Science & Engineering
NIT Srinagar · 2020 – 2024 · CGPA 9.0/10

LANGUAGES

English (native), Hindi (native), Urdu
